RECENT EMPLOYMENT HISTORY

Software Engineer, UrbanTide, Edinburgh

NOVEMBER 2023 — MARCH 2025

- **Designed and built Greenfield Applications in Nuxt 3**
  Utilised datasets as endpoints to visualise it in Mapbox tilesets and amCharts

- **Worked in a small frontend team on large-scale projects**
  Using Github CLI, Circle CI for CICD and AWS for image and web hosting

- **Planning, Design and prototyping**
  Daily use of Figma for wireframing and prototyping. Pinia for state management

- **Code reviews, testing and deployments**
  As I worked in a small team, we conducted code reviews, deployments and testing as much as possible.

Development Director, beTravelwise, Wiltshire

SEPTEMBER 2022 — SEPTEMBER 2023

- **Vue Developer and some backend Laravel**
  Took ownership and managed the Vue SPA e-learning course templates that compiles its data from an Excel Spreadsheet. I migrated this over to a non relational MongoDB whilst also building a Laravel backend for a Rest API.

SHOPIFY DEVELOPER, SIMBA SLEEP, London

SEPTEMBER 2022 — SEPTEMBER 2023

- **Front End Shopify Developer**

  Back to vanilla JavaScript and Liquid templating. Working on multiple multi lingual Shopify stores, UK, France, Spain and Canada. Creating and maintaining new and existing shopify's liquid template pages and product pages. Adding new products and setting up promotions and discounts for new and existing customers. Whilst also working on new up and coming features such as filtering products and bundles with bug fixes throughout.

CONTRACTING PHP, WORDPRESS, JAVASCRIPT

2000 — 2022

- **Freelance and short term contracts**

  A mix of varied work from Wordpress to Drupal 6/7. Working with PHP Symphony, Laravel, Angular, Vue

App Development and Game Development

- **Additional and great skills to have**

  Xcode, Swift, SpriteKit, Godot, Blender, I've done it all!
